Call today and speak with one of our friendly team for advice or a quotation

"The Radios are very good and an improvement on our previous ones. The weight and size is more convenient and the clarity and added voice features are reassuring. Many thanks for your assessment of our needs"

Mike, Hostel Assistant Manager

3

Our team are at your service for an onsite or virtual meeting!

www.maximonsolutions.com

OUR GUIDE TO RANGE

The range over which two portable radios can talk will largely depend upon the terrain or potential obstacles in their path...

RANGE IS VERY DIFFICULT TO DETERMINE...

... 2 radios talking 20 miles apart from hilltop to hilltop is quite possible...

INCREASE RANGE

Maximon Solutions will often utilise Local or Talkthrough Base Stations see page 20 for details about hiring one.

... BUT the same radios may only manage 500 yards if buildings are in the way...

4

Call the team, we are happy to talk through the options

Other Factors that may affect range...

- **Antenna positioning**
Keep it VERTICAL
- **Radio height**
Holding your radio higher will improve range
- **Proximity to the body**
Radios on belt clips and in pockets may be convenient but they will reduce the range drastically due to absorption

RADIO REPEATERS

INCREASE YOUR SYSTEM'S RANGE AND CAPABILITIES – DON'T SUFFER IN SILENCE!

There is no reason to suffer from poor radio coverage. To increase a system's range Maximon Solutions will often utilise Local or Talkthrough base stations – a site survey will enable us to design the most suitable system for your individual requirements.

MOTOROLA SLR5500 Digital

BATTERY BACK-UP

MINIMISE ANY DOWNTIME WITH OUR BATTERY BACK-UP SYSTEM

In the unfortunate event of a power cut, your repeater will switch to the battery back up system as its power source until the main power supply is functional.

This keeps your comms fully operational at all times.

BATTERY BACK-UP

COMPACT DESIGN WITH HEAVY DUTY 12V BATTERY, BUILT TO FIT ANY REPEATER

LICENCE MANAGEMENT

Maximon Solutions are fully approved by Ofcom to supply radio equipment.

As an additional service Maximon Solutions are pleased to offer a **Licence Management** and **Consultancy Service**, ensuring you have the correct and most appropriate licence in place.

Essentially there are two types of licences available for you, to help you understand, it will be either....

Simple UK LIGHT LICENCE

- Use anywhere within the UK
- Renewable every five years
- Offers several frequencies
- Not authorised for Base stations

OR

Technically ASSIGNED LICENCE

- Specific to one site
- Renewed annually
- Offers only one channel
- Local & Repeater (talk-through) stations can be authorised

30

Maximon Solutions will complete the full application - pay for it on your behalf and manage the licence through its term, alerting you when renewal is due to ensure everything is **100% legal** at all times. If you have an existing licence we will test that your equipment is programmed correctly.

**Let there be one less issue
to prevent you from running your business!**
